frequent tyer's answer was spot on.

you could tye 99% of all your flies with black thread and white or tan.

i use uni,gudebrod,fly master,griffin,whatever brand,and silk.

i also use no name thread from my local fly shop.

i don't really care whether thread is flat or not,or what brand it is.i just tye with anything i can get my hands on.

a spool of tan uni 8/0 would do you well.use it up and then you'll have a stronger opinion about what to use next.
