Pretty sure he just meant if you weren't there today it will be back to low and clear by tomorrow and will remain so until it rains again.

You could not have hit it more right. Today was perfect. Since you prayed for rain for this trip...continue to do so, we need tons more. 😊 Whatever you did seemed to work 🙏

Continue to be patient. Another couple of rains and the creek will have fish spread throughout the creeks! Remember, it's only September 22. It's EARLY. Feels good to get the skunk off in September though!
