Let us not be concerned with other's gear, least we be of our own. I have taken my 9 ' 10 weight down to PennypackPark just to practice.....The side effect is I catch fish with it. It's nice to try out homemade bass flies/streamers so close to home to see if they will hold up. Some of them I have trouble casting with my 3wt and even my 5wt. Best one I made so far was a streamer with brown and yellow hair and a green bead head. got a bit of everything to nail it. No trout in the creek at this time. Waiting to see if they stock it this fall.

A lot of the mixture of fish in any creek or lake is governed by a few other factors "Water Temp" and "access".
