Heck, I'm not sure, by just looking at someone put gear into a car, if I could spot what weight their rod is! Length, maybe, but not weight.

And for me, anyway, my most commonly used small stream rod is 7'6" 4/5 wt, and I have 5 wt and 7 wt line for it. The smaller the stream, the more likely I am to use the 7 wt line!

I've never personally fished this one, but I know what stream it is and know plenty of people who have. I'd very likely use the 7 wt line on it.
