I must say the lehigh browns are doing very well this year, I hammered them in the gorge last night. In two hours I caught at least ten, all between 12-18 inches. A few big chubs as well. Good hatches of olives, slate drakes and sulphurs(or whatever they really are, size 16 pale yellow mayfly) I haven't fished anywhere else in the past 3 weeks and I have caught at least a few nice browns every time. They look very healthy. Who needs fall stockings? Lol
