October is the month that bass seem to put the feed bags on. I've had luck with all the standard smallmouth flies - clousers, rabbit zonker streamers, poppers, etc. in the fall. It seems that if you find where they're gathered in the creek/river, you can have an amazing day. Some of my best days and biggest smallies have been caught in October. I love hitting the Susquehanna when the leaves are changing and the baitfish are jumping out of the water with a big smallie chasing after them!
