That is the great thing about our sport. You can try the beetle or hopper and it may work. However, I would suggest trying the beetle amazon. You could try it right at the last light of the day. When there is just enough light to see the ripples caused by the splat of the large beetle hitting the surface. Frustrated at the poor presentation and cast strip it in waking it across the surface thru the pool and over that trouts head. You know, you can still call it a beetle.
