wolly bugger

The rest would be special flies I use which are not common.

These three wets (1,2,4)

This nymph

This midge (top one)

And LouM's Sculpin (or did he steal it from Sandfly?)

If I added one more it would be an unnamed streamer I found in a book tied using India Hen feathers would on a streamer hook.

BTW this is close enough to topic that it could be discussed on the general section. (I do realize that the best minds on the forum hang out here. 🙏)
