On Dunbar Creek across from the Gun Range there is a pipe that is a problem. It carries Elk Run to the confluence of Dunbar. Elk Run has native brookies in it. the cuvert drops at least 4 feet from invert out to the stream bed. CRTU contacted PennDOT concerning repairing it as the area around the pipe ultimately will cause a road failure but got no response. Its Dunbar Ohiopyle Road, not sure what the SR number is though.

Good example.
