A lot of advice, but here's my two cents...

Tie on a big, busy streamer, I'm talking something with Krystal flash, rubber legs, nice webby hackle and really nicely plumed maribou. Tie on as much #censor# on it that you can so that as it falls it wavers. Stay low and away, cast it so that only your leader hits the water if possible. Give it a few seconds to fall if the current allows and then strip it. This will give you two presentations in one drift.

Welcome to boom city.
