Jack,

Glad to hear you got them. I figured they should have been there yesterday or today. I used the size small sculpin helmets. On the pack it says they are for size 2,4 or 6 hooks. Your flies are tied on a size 4 - 3XL nymph hooks. They were a bit snug when I fitted them over the turn down eye. When tying flies using sculpin helmets it is important to leave enough room between the materials and the eye for the head. Also, test fitting the head is very important before applying any super glue or Zap-a-Gap. Hopefully with the big brownies moving around this time of year and tying on the feed bag you can get into one with one of these streamers. Good luck!
