Stimulator

Foam Beetle

Zebra midge

Griffith's Gnat

These would be my top ten trout flies. Have caught about 75% of the trout I caught so far this year on these patterns. Looking back through fishing logs can be very interesting. It seems for me that I get in rut fishing the same pattern for a long period of time as it continues to produce and I gain more confidence in the pattern. I often think that switching flies more would be a good thing (from the experience end) but I just have trouble doing that when I am really catching fish.
