Fished the Codorus Creek TT section this sunday afternoon from 4-7 Pm. Lots of black gnats and fish were rising in the pools upstream from the bridge. Not rigged to fish anything as small as a gnat so decided to take advantage of the rises with a 14 Mosquito. Caught one 5" Brown right off the bat and a nice 12" brown a few minutes later.

Tough area to fish though no room to cast and difficult to roll cast to the fish but many rises and no takes.

Went back to the Brown St. bridge and and fished the pool just above it picked up a nice 13" holdover rainbow.

Tried fishing downstream from the bridge but nothing else.

Overall great day out on the creek.
