Bruno, Thanks for the kind words!

Gutcutter,

We design our products down to the core here in PA, the designs are then sent overseas and mass produced. These are all unique designs we come up with, they are not stock products with our logo printed on them. Other than that the entire business process is run out of PA.

As stated in your post, we do not compromise in quality. We pay a high end price and sell for what we think is a reasonable price for everyone. It is very important to us that we offer top of the line products simply because we are fishing almost everyday.

We have a reel prototype we are testing now also. It will be the lightest fly reel on the market, 100 percent waterproof and will also be budget friendly. It will be a good amount of time before it is on the market but it is beautiful.

Shadow is a fly company not just a rod company. We will continue to offer these unique products in all fly fishing categories. We have some very cool ideas we can not wait for everyone to see.

Make sure all attending the jam ask to Bruno to fish the rod.

Thanks guys.
