I use them...at least once an outing if I'm into a fair number of fish. Just makes life easier on you and the fish sometimes depending on how they're hooked.

I lose them too...maybe a pair every other year or so. I just clamp them to a strap on my bag and they get knocked or pulled off once in a while I guess and I don't notice until the next time I need them. I've found two pairs while fishing too...one was rusted and no longer usable, the other was banged up a bit but still in usable condition. They're now in my bag as a backup. Weird thing is where I found them...both were on steep, remote streams you wouldn't expect to see a lot of anglers on.
