Well said geebee, when I first heard of the proposal to somehow wipe the stream of the rainbows, I thought it was a joke.. And to think that a few anglers today would decimate one of the best natural reproducing rainbow streams in the east, not to mention some of the biggest and fattest healthiest fish I've ever seen!!! I say let the stream decide and run its course, it's only just starting to heal from the hatchery back in 2001, why does man have to tamper with it again so soon?
