I always carry a pair. I usually don't need them, but occasionally even my barbless hooks need a little extra torque.

My girlfriend is a surgical physician assistant. Over the last year, she has supplied me with enough hemos, in just about every shape and size one could desire, to last a life time. When she was still in school, she did a rotation in MT. After she mentioned that I fished, the Dr.'s there (regulars on the Bighorn) made her take home several pairs for me to try out.
