After threatening me, he told me that although the land owners don't post the land at Odie road, they may not want me fishing there. I told him I spoke w/ two women earlier and they were fine w/ it. He kind of grimaced. I had an okay exchange w/ him after that. I think he saw I wasn't some slob out there leaving bait containers and beer cans all over the place...but I never did have the guts to ask if I could fish on his land.
