I don't have a lot of time either, so scouting and fishing go hand in hand....I do however prefer to fish stained water, granted this is my freshman season, so I have a lot to learn , however I've raised quite a few Muskies in a short period and I've kept track of conditions. Stained water and sh** weather conditions has been good to me. Throw in a specific moon phase and I'm like a crackhead, can't sit still and talking gibberish...haha...I've caught the musky bug bad
