October is a great time to fish the yough.

You should have the opportunity to fish dry flies then if you desire also.

Besides the small BWO's previously mentioned, I also fish slate drakes and caddis there in the fall.

And occasionally, have hit nice winged ant falls - even into november.

As for the CFS, I also like it to be under 1,000 - which it usually is in the fall.

I've seen it get as low as 500 at this time of year - and the fishing was terrific. Makes it easier to wade and reach fish.

good luck
