Yeah FI. I mean, the history is there and I respect the history. I guess I just have a hard time seeing the bows as some kind of invasive species in BS if the heritage strain of the brookies isn't there anymore. There are a lot of people who treat those 'bows like one of the seven plagues. It's a unique fishery, brookie or bows. Mistakes may have been made in the past concerning management of the native species, but you can't go back and fix that now.
