From what I am reading Prof is an elitist. Hemos have a place

Yeah, clipped to his underarm hair. He probably just tells you you don't need them to get you riled up. Or because he doesn't have any. Except the ones under his armpit. Doesn't make him an elitist. I would think an elitist would USE hemos while unhooking his barbless hooks while not removing the fish from the water.

If he picks his fish out of the water, yanks the hooks out with his sausage fingers before taking a picture then he is a.....wait thats me.
