Salmonoid,

Great explanation of a very productive technique. I have used that technique on many occasions and it has worked well for me. However, I never really dissected the stream bed or structure like you described in your post. The next time I find myself using the "dapping" technique I'm sure I will go about it with a different mindset. Really nice photos and again, the detail in your explanation is really great and very informative. Thanks for sharing it with us.
