Nice fish. Here is another leader tip; add a tippet ring before the smallest tippet. Attach the leader and tippet to the tippet ring with an improved clinch knot. The tippet ring will keep you from eating into your leader as you add new tippet. Everything above the tippet ring will remain in tact as you tie in a new tippet as needed. The tippet ring will float without issue. This will extend the life of your leader. I found this to be especially helpful for hand tied leaders, but the tippet rings work with store bought knotless leaders too.
