I've been wanting to fish the FFO area of Muddy for a few years and just never got the chance to do it. I was in the area late Wednesday afternoon (10/2) and slipped in for about an hour. The only stretch that I previously had fished on Muddy was down below Woodbine. I parked at the small parking area along Piney Hill Road and started fishing right below the parking area. I only covered about 100 yards of stream in the short time I was there. I saw an area where it appeared that a few fish were rising so I slowly worked my way upstream to within casting distance of them. I put on a dry/dropper rig and dropped a cast in the vicinity of the risers. I connected with a scrappy brown on the first cast. I caught a half dozen browns (all 10-11' long) in less than an hour, all caught on the dropper fly. I also lost a much heavier fish (didn't really get a good look at it) and lost a small wild brownie (maybe 6 or 7 inches). There seemed to be lots of fish and they all looked very healthy and were great fighters. I was very impressed for my first visit to the FFO stretch. I don't know what took me so long to finally check this out but I will definitely be back because I know there is a lot of water to explore on this stream.
