I love tech and gear - gps w/ detailed topo, locator beacon, android phone w/ map apps, infrared thermometer, shock/waterproof camera, motox shin guards, breathable waders, silly \$100 vented fishing shirts. Makes fishing better and safer.

Sometimes imho it's better to compromise fishing for the sake of the fish. Catch a first brookie from a stealthy lie below a nice pool, line around branch, better to walk up and spook em to let that fish go. Same with camera. Sometimes better to compromise picture for sake of the fish. If you cant take a fast image, there's always another fish.
