Yes, they cranked up the flow from 30cfs to over 100. I tried fishing my sculpin patterns in the fast deep water to no avail. Not wanting to be skunked, I switched to my GP go to fly (pink SJW) and got one on the second cast.

There were a few fish rising too. I have been doing well, at least very entertained with Tricos from 1100 to about 1300 a couple of times a week over the last few.
