I would like to have a lighter set up for fishing pickering and french creek should I go to a 3 or a 4 weight and shorter?

A 7'9" is a great size for those streams. Hard to say if a 3 or a 4 would be best because manufacturers rate so differently. So, it would depend on the specific rod.

But (flame suits on) it's possible that overlining may help if the rod turns out different than what you expect.
