It is a nice alloy, with some attractive properties, and I work with it and similar alloys all the time.

pc, you may be onto something here.... hmmm, "nice alloy"

Copy should have read,

"In instances where stainless is more appropriate, we chose a "nice alloy" like 17-4 PH rather than the typical, far "meaner alloys" 302 or 303 found in other reels."

As usual, pc, your knowledge is quite impressive (and entertaining!)
