When I bought my 7'9" 2 weight - over 20 years ago now - I mated it with an Orvis CFO I. And it worked OK for years - although that reel was a little small and light IMO. (I prefer to fish a 3 weight line on this rod)

Several years ago, I had the opportunity to buy an orvis battenkill bar stock II used off of another forum member. And I've been using it ever since, and like it better. Just a little bit larger than the CFO. Holds more line and even has room for a little backing. And balances the rod better
