Well they stocked my local stream, I fished it a week or so before the Fall stocking and although levels were low fish were in every pocket, the few that I didn't spook were feisty and I even hooked into a couple of rainbows that made it through the summer, all fish were released and full of vigor.

I went back yesterday, 1 week after the stocking, lots of garbage, empty corn cans left on the rocks, bottles, etc. I know that stuff wasn't there 2 weeks ago. I couldn't find a fish anywhere, and ran into 3 or 4 other anglers, all who had no luck.

My guess is the stockie followers came in and did their dirt, left their garbage and took whatever they caught, stockies and some of the hold overs. Whatever fish were left were hiding tight and in more than total spook mode.

If this is what Fall Stocking is about please get rid of it.
