Jeremy, if you feel like you are getting to close to the fish, try fishing directly upstream and wade cautiously. Line control is a major thing to work on fishing that way though. I will be honest and I am not trying to get in an argument, but if you have the chance check out a comp. Just to watch those guys nymph. You will learn a lot and in no way ever have to become a comp angler. It really is something worthwhile to check out.

Que Trolls.
