Me and my buddy were discussing waterway rights on streams in pA and he told me that you can fish any stream as long as your in the water and not on land which would be trespassing, I know you can't fish 'any' stream as long as your In the water, but how do you know what streams are which? . I know the little J had this issue recently and a few others. My friend recently got back from elk creek at Erie and he said that some property is posted but you have to stay in the water to avoid trespassing. Any info info on this would be appreciated
