Marc - how'd it break ? on a blue ?

if it was casting then yeah i'd junk it. some rods (sage...cough...cough) are just not up to the job and design flawed.

I have a Greys Platinum XD and love it. around \$270.

I have cast the TFO BVK and that is a nice stick too.

i'd also look at the older sage rods on Ebay or Speypages - RPL, RPL+ RPLi RPLXi - but not the Xi2 or Xi3 - overpriced junk.

I have a 11wt RPL+ and it casts a 350gr line like a dream.
