Thanks, guys. Jeremy, I was surprised, too, bc the pictures I have seen look chartreuse. The other funny thing is that some people call this the Czech Cat Nymph...whereas I actually just emailed George and he prefers Czech Catnip.

Either way, I prefer the chartreuse, though I probably should give the olive more of a chance. That scud grey color is nasty stuff that works great on Spring Creek (and most others that have a brown/grey scud population). Good luck with everything!

Tim
