Whatupwitdat?

I was kind of wondering the same thing, Squatch. I have definitely seen a bit more pressure on the section that I have been fishing than I saw during the summer. I stopped for about a half hour this afternoon and saw the vehicles mentioned above. I didn't talk to anybody but did manage to pick up a brookie and two brownies at one of my favorite "little" spots. It was still somewhat off color and running strong from last weeks storm.
