Mike, I hope your scenario explains my experiences... but i suspect i am just looking in the wrong stream sections or they have been fished out already 10 days after stocking.

Anyone find significant fall stocked fish to catch on E Br Perk or Pennypack (in Lorimer park)?

as far as I can tell those are on the list and were stocked, but i fished them for a few hours and saw not a single trout (saw some last year on pennypack)

as for the E Br Perk, i fished it today for a few hours along the walking trail / park in perkasie and was surprised to see so few fish of any type. I am used to seeing a much higher population of redbreast sunnies in that kind of water. It was very low. All I caught were shiners / chubs 😞
