When you all visit Spring Creek, take a look at the mowed trails on the PFBC lands from Route 550 upstream to the "cottage stretch" below the Paradise. There are also some mowed trails in the canyon, from the pistol range downstream a ways.

In many places these trails are very near the bank. Or even right up to the water's edge. And some of these mowed trails are 15 feet wide.

Both Spring Creek TU and Clearwater Conservancy have asked that this situation be fixed. And these requests have been made for years. To no avail.

PFBC people, from the local level right up to the very top, know about this situation.

Any suggestions?

Who does the mowing? Been a while since I was in those stretches. I can't picture the mowed area you are describing. Is it possible that non-fishermen use the area and the mowing is more for them?
