Here's a pattern I want to share with all, especially now that it's steelhead season. This fly, Ian's Brass Ass, was designed around the Great Lakes region and tied specifically for steelhead. It has since caught on with the Czech-style crowd, and has caught many trout and grayling. It's a great pattern to have in your box, between sizes 10 & 20, plus feel free to vary the colors of the wire; hope you enjoy!

Tim
