I appreciate the comments. Fishbait, wrapping the wire over the flash is absolutely possible, and it's personal preference. By wrapping it over the flash, you definitely secure it, however the addition of an epoxy or UV glue makes it a moot point. If you'd like to wrap over to view the ribbing, then by all means go for it.

A very nice video, great presentation. Thank you.

Is wrapping the wire over the pearl flash physically possible or practical?
