Spring Creek perpetually has a sewage smell. Its a shame. One wonders how much better the fishing would be if the 3 fish hatcheries and 2 wastewater treatment plants didn't discharge to it. I noticed at Sheetz an oil/gasoline sheen draining off the parking lot within 100 yards of Spring Creek. I just shake my head when I see the Kayakers and recreational tubers float down the creek oblivious to what goes in. They are bathing in basically treated sewage.
