C'mon FI. We aren't that far apart. I can remember us cranking out some big old wooly buggers in the mid 80's at PSU. But when I think back to the late 70's I don't remember even knowing what a wooly bugger was. It was all wooly worms back then. I think it may be time to get the old wooly worm out again and give it a work out bet it still works! 😊
