JVenizia I use 40 lb flouro for my leader. Usually somewhere between 3.5' and 4' with a loop big enough to pass the large hooks through. I then tie 12-18 inches of 80lb flouro to my fly with a non slip mono loop and at the end either tie another non slip know or a perfection loop. Then I can switch out flies faster and you use a lot less 80lb in the long run which is a plus when its \$25 for 25 yards. IF i'm doing a lot of wade fishing I will also tie in a short piece of 25 lb mono to my fly line and then blood knot that to the 40lb so if I get hung up I can break off at the leader and dont' break the fly line since the breaking strength of even heavier lines is only 30lbs.
