bad weather = big fish !

when the beach gets churned up the stripers are in hunting best time to hit them. I agree with marcq on this. been chasin them for over 40 years and fishing a good noreaster is the best time. Now for blues they tend to like cleaner water. This bad weather is where a 10, 11, or 12 wt. comes into play with large water pushing flies. but is the best time to get a 30 lb+ fish. I'll throw 12 in. flies for stripers at that time and a school bus yellow in color is my favorite.
