I own the property just below the Benton Dam which is open to fishing. I have signs out stating that fishing is permitted walk in only. As afishinado stated Fishing Creek is not legally deemed navigable. The heavily posted areas are patrolled and its best to just stay out. There is plenty of open areas on Fishing Creek to fish so there should not be much in way of complaining about lack of open water. Most people are just too lazy to explore new areas so they complain that FC is posted up. It's one of the best trout streams in PA.
