I just returned from fishing the Oak Sun-Tues. Way more kings than browns and lots of zombies putzin around if thats your thing. Browns and steelies were being caught but in small numbers on size 14 white, orange and egg colored sucker spawn in the early AM. This time last year was dynamite but the warm weather and the fact the water temp was 58 yesterday when I left around noon tells me that good things are to come when the temps continue to drop.
