Totally agree, as a current MD resident and former Ohio resident. PA has always charged too much for a non resident license. Especially considering that you are paying those steep prices to stock fish that the Erie clubs are making big bucks off of. (Sorry had to go there). I think Homewaters has an amazing business model, privatize publicly funded fish and cash in on people that have too much money to know what to do with). Sad, but an impressive little racket. Sorry for the rant long week, and I will continue buying a pa license, cause the fishing is pretty amazing in your state for an average joe with an average paycheck.
