There are certainly many cheaper states, but on the other hand there are also more expensive states. It'd be interesting to see exactly where our license prices fall in relation to the national average.

My friend from out of state who was born and raised in PA came home for the holidays last year and we wanted to meet up for a few hours on a stream. He has 1 kid, his wife is pregnant with twins, and he's in med school. He couldn't afford to pay \$32 or whatever for a few hours fishing, so we didn't go. It was a big bummer and definitely an instance where the cost was prohibitive.
