Dams are out!

Well I saw the latest stream improvement on the Jodan and Little Lehigh in Lehigh county.

The dam at 7th street is gone and now the stream above it looks like a shallow drainage ditch. The footbridge in the park along with the stone wall on one side is gone. Why did they remove the wall?

The dam above fish hatchery road is gone and now it is a shallow riffle. The stretch above the dam that was flat and with some depth is still flat with very little depth. The dam at Robin Hood is now a riffle and the water above it is shallow and featureless.

Now they need to come back and fix it!
