Generic nymphs like pheasant tails, hares ears, stoneflies, flies tied on scud style hooks work well. I like a dark brown bead head nymph in size 14. Small streamers can be effective. I like to use a weighted size 14 nymph and a smaller fly like the midge you speak of as a dropper, the larger fly gets the smaller one down to where the fish are but can also take fish as well. Zebra midge is one that works well.
